Biomedical solutions

Customer: Sydvestjysk Sygehus, danish hospital
Location: Esbjerg, Denmark

"We have been using Vestfrost biomedical refrigerators for about 2 years at Sydvestjysk sygehus, and have about 80 units throughout the hospital.

Through our own central monitoring we have been able to attest that the units consistently operate in our desired temperature range, which gives us confidence that our content is at a minimum risk when stored in Vestfrost cabinets.

We would warmly recommend Vestfrost to others looking for effecient and reliable cooling solutions."
